Dual 24" Monitors tilted to provide better viewing.

RackMore Multiple Monitor Rack Mounting System

The RackMore multiple monitor mounting system provides rack mounting of VESA Standard (75mm, 100mm and 100 x 200mm) mount monitors in single and multiple mounting configurations in EIA standard 19", 23" or 24" equipment racks.

The system is comprised of an adjustable rack mounted bracket plus the required mounting plates and adapters necessary to mount the desired monitor combinations. All system components are manufactured with heavy gauge steel to provide maximum stability. The RMVM-200 series brackets provide settings for in and out adjustment as well as tilt adjustment to obtain better monitor viewing angles. Horizontal adjustment of the monitor(s) is also provided which allows flexible monitor positioning.

Monitors may be mounted in portrait and/or landscape directions as well as mixing different sizes as shown.

Rack Mounted Bracket
